Using the trial version of Clicktionary will count as a new subscription for your language. If you are using the trial version of Clicktionary, you need to make a payment to continue

Clicktionary English-Vietnamese

☒ Unlock your computer by keying in a secret text string. ☒ Automatically unlock the entire computer to get back into it immediately after being locked. ☒ Various combinations, including 9 characters, are supported. ☒ There are three modes, including automatic mode, user mode and timing mode. The number of times the PIN (password) key is pressed, whether to make the PC go into idle mode or in startup mode, and the time for which to lock the PC are customizable. ☒ A key is not needed for non-English languages such as Chinese, Japanese or Korean. Features: ☒ "Private" mode, which encrypts your personal information when you turn on your computer ☒ The keyboard is not required, so you can use a USB keyboard instead ☒ Multiple languages can be entered ☒ It supports only Windows NT, Windows 2000 and Windows XP ☒ It works with any PC. It does not require a PC to be fixed in a specific way ☒ It has no extra software to run after you buy it ☒ It is free from viruses and spyware ☒ Does not require a computer operating system ☒ Reliability: It has a 5-year product warranty Benefits: ☒ Non-intrusive: It is easy to set up and activate, and will not have any effect on the operation of the computer. ☒ Private: A password is used to encrypt your personal information. This enables you to get back into your computer easily and also protects your personal information. ☒ Easy to use: You can use it in a way that is familiar to you. You can use a combination of any of the three modes (user mode, automatic mode and timing mode) that suits your needs. ☒ Free of any viruses or spyware: All you need is a Microsoft Internet Explorer 6.0 or later browser and the software. You can download it from the website or from the software's page on the website www.keymacro.com. Wrap-up: As long as there is a need for "private" computers, there will also be the need for "private" passwords. However, the need for the protection of passwords can only be fulfilled by software. With "Private Password Protection", the password protected area is protected with the 77a5ca646e
