K-Meleon nLite Addon is a feature-rich application designed to offer a fast and secure method to browse your favorite websites and which supports tabs to open multiple pages. It features bookmark and history lists, privacy properties, email reader, online translation, and also supports add-ons and themes. Surf the Internet at a good speed The program provides a well-structured and modern interface, showing the loaded URL and all the necessary elements in a standard toolbar. Plus, it can be used as a stand-alone tool or as an addon for nLite program. Chat with friends, check the weather and read the news When you start the app, a default link is loaded, which can be easily replaced with a custom one from the menu. Plus, you can browse websites in

multiple opened tabs for more efficiency, navigate through them using the navigational buttons, and stop and refresh the link at any given time. Look for terms and customize the toolbar K-Meleon nLite Addon offers a search function, which finds the words as you type, as well as highlights them. You have the option to use the match case for a more accurate find. You can make the toolbar less cluttered by hiding the bookmark icon, privacy, additional buttons (e.g. print, zoom), and the main bar. If you have poor vision, the zoom function comes in handy to view small details better. Add records to bookmark and manage the history You can insert sites into a favorite folder, where they can be sorted and deleted. It's possible to view all the visited links in the history panel, copy them to the clipboard, and clear the list anytime. The app lets you save all the sessions and load previous ones, and set a
