No matter if its publishing a web page, downloading demos, software, MP3 files and images or transferring high volume files over an unstable connection. WorldWide FTP does it all. Download your secure ftp client today of our ftp software and see for yourself. WorldWide FTP can transfer files and directories, or even entire directories from server to computer. Its easy to use; just drag and drop folders from your computer to WorldWide FTP and the files and/or directories will transfer to the computer. When you drag and drop the entire directory of a directory on the WorldWide FTP window it will be immediately transferred to your computer, and the directories contents will be displayed in the directory. WorldWide FTP can transfer both small files and large files. You can even use WorldWide FTP to download files larger than 4GB. WorldWide FTP is easy to use for both experienced FTP users and beginners. Advanced users will find WorldWide FTP easy to configure and useful with its complete list of functions. A large number of functions are available through the menu structure or by pressing the Tab key. WorldWide FTP can create and edit FTP connection profiles. FTP connection profiles enable to connect to a FTP server by using the same connection parameters as are used to connect to the server every time when the connection is established. FTP connection profiles make it possible to use WorldWide FTP over any FTP server with the same parameters, which is of particular value when the FTP server changes its settings. WorldWide FTP offers three different transfer modes. In active mode the transfer will continue until the FTP server accepts or rejects the connection. In passive mode the transfer will continue until the FTP server accepts or rejects the connection. In bandwidth mode the transfer will continue as long as the bandwidth will allow. The transfer will continue as long as the transfer will not require more bandwidth than is available. WorldWide FTP makes it possible to edit FTP commands, which are used when connecting to an FTP server, or the used FTP commands are automatically used
